DETAILED ACTION

This Office Action is responsive to the amendment filed December 22, 2005.

Claims 4, 7-9, 13, and 16-18 remain withdrawn as drawn to a non-elected species. In response to the applicant's note on page 8, the examiner notes that withdrawn claims may be considered upon allowance of an independent claim. However, the examiner notes that potential indefiniteness issues with these claims should carefully be corrected (see for example, claim 7, "the straight portion" should be amended such as in claim 6).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5, 6, 10-12, 14, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Orihashi (JP 11-210713).

Orihashi discloses a stabilizer bar (1) comprising a torsion portion (central portion at "1", see Figure 1); arm portions (see also Figure 1) extending from the opposite end portions of the torsion portion; straight portions (see Figure 2, location of "2") provided proximate to the opposite end portions (i.e., near), the straight portions extending along an axial direction; end portions of the arm portions (1a) mounted to the vehicle via bushes (5); and a stopper (10) provided to one of the straight portions, the stopper preventing one of the straight portions from

moving more than a predetermined instance in an axial direction with respect to one of the bushes, which is provided to one of the straight portions. The stopper is provided to opposite sides of the bush (see 10; Figure 1). As shown in Figure 3, the stops are annular. As shown in Figure 2, portions 11, 12 of the stops have a “C” or “U” shape.

Response to Arguments

3. Applicant's arguments filed December 22, 2005 have been fully considered but they are not persuasive.

On page 10, Applicant argues that “Orishashi does not disclose or suggest such a straight portion”. In response, it is noted that the portion of the stabilizer where a bush 2 is mounted as seen in Figure 1 clearly a “straight portion”.

On pages 11 and 12, Applicant appears to discuss various other features regarding Orihashi such as “unevenness”. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

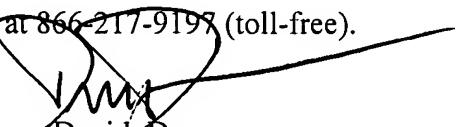

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
